DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the applicant's admitted prior art (AAPA) (Figures 6A,6B; page 1, line 12-page 4, line 15).

Regarding claim 1, AAPA discloses a broadcasting system having at least one input device for receiving sound (inputs 11-14, Figure 6A), at least one output device for broadcasting the sound (output devices 21-24, Figure 6A), and a controller interconnected through a network (30, Figure 6A), said broadcasting system characterized in that:

Said controller, in response to a broadcasting request from an arbitrary one of said input devices, delivers routing data indicative of a combination of said input device which has made the broadcasting request with said output device which should broadcast the sound from said input device to all of said input devices (page 1, lines 12-page 2, line 5, Figure 6B).

Claim Objections

3. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
